Special Economic Zones - special benefits and opportunities for investors

The Special Economic Zones (SEZ) are the result of successful connections of the needs of investors with the needs of the particular regions, in which they have been situated.

Each zone is an administratively separate part of the Polish territory, allocated for the running of businesses on preferential terms. On entering an SEZ a business is assured of tax benefits. An additional benefit is the fact that businesses can begin trading on a specially prepared site, fully equipped with the necessary utilities.

Another aspect is that the new investments have a significant impact on the economic development of the Polish regions, in the decrease of unemployment and the increase in the competitiveness of our economy.

Permission to begin trading in an SEZ is granted by the management board of each zone; which also assist in the investment process, e.g. through the easing of contacts with local authorities or central administrations and in questions relating to the purchase of land for investments.

The Special Economic Zones have been set up for the purpose of:

- speeding up development of the Polish regions,
- developing and utilising new technical and technological solutions in the national economy,
- increasing the competitiveness of goods and services,
- developing the potential of industry and infrastructure,
- creating new jobs.

To find out more on the Special Economic Zones please visit the website of [Polish Information and Foreign Investment Agency](#).

On the same page don't miss the information of business opportunities offered by [Industrial and Technology Parks](#).
