DEFENCE

The innovative equipment produced in Poland and the latest communication and information technologies, such as software radio stations, or data transfer devices in military vehicles, have been acknowledged on internationally and are storming military markets around the world.

The export of the latest generation of armaments from Poland has been growing continuously for many years. In recent years exports of domestic armament and military equipment were carried out mainly to countries in the regions of North America, the European Union, Southeast Asia, and North Africa. These countries acquired ultra-modern tanks, innovative armored combat vehicles, reliable assault rifles, semi-automatic pistols, and grenade launchers.

Poland has proved many times, that the country is a reliable partner and a representative of technologically advanced and modern defense solutions. The high level of responsibility of Polish producers and their ceaseless efforts in the implementation of new technologies, unique solutions and innovative products cause, that our companies are competent, reliable and solid business partners.
