Polish Furniture

2015-12-19 20:45:11

Poland is a power of the global furniture industry, as 9 out of 10 products made in this country end up in living rooms, offices, kitchens and gardens of clients around the world. Due to their popularity we hold the third place among furniture suppliers on the markets of the European Union. This success is also depicted by the fact, that we are the fourth global power in this sector, and our export quantities only yield to those of China, Germany and Italy.

FURNITURE

Poland is a power of the global furniture industry, as 9 out of 10 products made in this country end up in living rooms, offices, kitchens and gardens of clients around the world. Due to their popularity we hold the third place among furniture suppliers on the markets of the European Union. This success is also depicted by the fact, that we are the fourth global power in this sector, and our export quantities only yield to those of China, Germany and Italy.

The hike in production capacity and the high quality of the furniture produced in Poland caused our export volume to increase fiftyfold since the year 1989. The value of the production sold to international markets by the group of nearly six thousand enterprises is equivalent to almost 27 billion PLN. This number is increasing exceptionally dynamically by around 10% annually.

Polish furniture stands for excellent quality products and functionality. They are most appreciated in Germany, Great Britain, France, the Czech Republic, and Sweden. However, they are also becoming more and more popular in Canada, Russia, Holland and Australia.
