Polish Construction Industry

2015-12-19 21:03:47

The Polish construction industry is a relevant sector of the Polish economy. It is also our export specialty, which in conjunction with an exceptionally strong correlation of the industry with the investment market and the labour market causes, that its importance must be considered outright strategic. The estimated value of the market oscillates around 40 billion euros annually.

The Polish construction industry is a relevant sector of the Polish economy. It is also our export specialty, which in conjunction with an exceptionally strong correlation of the industry with the investment market and the labour market causes, that its importance must be considered outright strategic. The estimated value of the market oscillates around 40 billion euros annually.

In relation to the value of the domestic segment, around 10% of the overall construction and assembly works are carried out outside the Polish borders. This is equal to a labor export volume of three billion PLN annually. Their high quality caused Polish construction services to be in demand around world.

Apart from that, materials, construction equipment, installations and construction chemicals made in Poland are making a real career on European and global markets. Supreme quality Polish products, produced on the most modern production lines, by means of cutting edge technologies, are associated with durability, aesthetics, toughness, functionality and ease of processing.
